

PATIENT INFORMATION

Patient Name: Mr. Siddharth Deshmukh	Age / Gender: 34 Yrs / Male	Patient ID: SOTC-OP-30215
UHID: UH2026MH003021	Date of Birth: 09-Nov-1991	Visit Date: 22-Jul-2026
Mobile Number: +91 98220 XXXXX	Blood Group: AB+	Emergency Contact: +91 98903 XXXXX (Wife)
Height / Weight: 176 cm / 82 kg	BMI: 26.47 (Overweight)	Known Allergies: Penicillin
Address: B-802, Kumar Paradise, Baner, Pune - 411045		

DOCTOR & DEPARTMENT

Consulting Doctor: Dr. Aniket Kulkarni	Qualification: MBBS, MS (Orthopedics)	Reg. No.: MMC-91274
Department: Orthopedics & Trauma	Specialty: Sports Injury & Fracture Care	OPD Room: Ortho Block, Room 108

CLINICAL NOTES

Chief Complaint:	Right wrist pain and swelling following a fall while cycling, 2 days ago
Present Illness:	Localized pain, restricted movement, mild swelling over distal radius; no numbness
Medical History:	No known chronic illness
Surgical History:	None
Family History:	Non-contributory

Blood Pressure	124/80 mmHg	Pulse Rate	78 /min
Temperature	98.6 F	Respiratory Rate	16 /min
SpO2	99% on room air	Pain Score (0-10)	6/10

DIAGNOSIS & ASSESSMENT

Diagnosis:	Closed fracture, distal end of right radius (undisplaced)
ICD-10 Code:	S52.501A
Assessment:	X-ray confirms undisplaced distal radius fracture; managed conservatively with below-elbow cast immobilization for 4 weeks.

PRESCRIBED MEDICATIONS

#	Medicine (Generic / Brand)	Strength	Dose	Frequency	Route	Duration	Qty
1	Paracetamol + Aceclofenac (Zerodol-P)	325+100mg	1 tab	BD, after food	Oral	7 days	14
2	Pantoprazole (Pantocid)	40 mg	1 tab	OD, before breakfast	Oral	7 days	7
3	Calcium + Vitamin D3 (Shelcal-CT)	500mg+250IU	1 tab	OD, after food	30 days	30	
4	Thiocolchicoside (Myoril)	4 mg	1 tab	BD, after food	Oral	5 days	10
5	Diclofenac Gel (Volini)	1% w/w	Local app.	TDS, on swelling	Topical	7 days	1 tube

Special Instructions:

- Keep the cast dry at all times; avoid wetting during bathing.
- Elevate the affected limb above heart level to reduce swelling for the first 48-72 hours.
- Perform finger movement exercises regularly to prevent stiffness.
- Report immediately if fingers turn blue/pale, become numb, or swelling worsens.

LABORATORY & DIAGNOSTIC RECOMMENDATIONS

Investigation	Reason / Notes	Priority
X-Ray Wrist (AP & Lateral view)	Confirm fracture alignment	Done today
X-Ray Wrist - Repeat	Check healing progress at 2 weeks	Scheduled
Serum Calcium & Vitamin D	Baseline bone health assessment	Routine
CBC	Pre-procedure baseline	Routine

FOLLOW-UP & LIFESTYLE ADVICE

- Review Date:** 05-Aug-2026 (2 weeks) for repeat X-ray and cast check
- Diet Advice:** Calcium and protein-rich diet - milk, leafy greens, eggs, pulses
- Exercise:** Gentle finger and shoulder mobility exercises; avoid wrist movement till cast removal
- Hydration:** 2-2.5 litres of water daily
- Emergency Symptoms:** Increasing pain, numbness, fingers turning blue/cold - visit ER immediately

BILLING SUMMARY (ESTIMATED)

Description	Amount (Rs.)
Consultation Fee (Orthopedic Surgeon)	900
Registration Fee	100
X-Ray Wrist (AP & Lateral)	600
Below-Elbow Cast Application (Procedure)	1,800
Serum Calcium & Vitamin D Test	1,100
CBC Test	400
Estimated Medicine Cost	950
Subtotal	5,850
GST (as applicable)	175
